

Department
of Health

New York State Public Health Corps (NYSPHC) Fellowship Program

Finger Lakes and Western Regional Consortium

September 20, 2023

Welcome!

Agenda

- Welcome and Opening Remarks (5 mins)
- Presentations by Wade Norwood and Matthew Crehan Higgins, PhD (50 mins)
- Q & A – Moderated by Margarita Sumeguín, Local Coordinator for Ontario and Yates Counties (10 mins)
- Break (5 minutes)
- Fellow Spotlight 1 – Polly McDaniels and Nick Pavio (15 mins)
- Skill Building Activity – E-mail Best Practices, Amanda Hagzan (15 minutes)
- Fellow Spotlight 2 – Joanna Craigmile (15 mins)
- NYSPHC Announcements and Updates (5 mins)

Stigma and Information Access as Social Determinants in Sexual Health

Setting the scene

Then

Unintentionally, many prevention efforts kept people apart.

- Abstinence
- Avoidance
- Choosing partners based on HIV status

Now

Today we have the opportunity to reduce stigma

- More knowledge about HIV
- Access to better treatment
- New prevention methods

Presenter observations

- Bad news travels fast.
- Bad news lingers longer.
- Bad news becomes a scare tactic.
- Good news moves slower (especially when it is an evolution of understanding).
- Good news struggles to replace the linger of bad news.
- Good news reaches people who seek sexual health information ongoing first and is often framed more conservatively than necessary, compromising community confidence.

Our goal

change the conversation about sexual health away from stigma and toward one that celebrates connection and choice

Then

**A BAD REPUTATION
ISN'T ALL YOU CAN GET
FROM SLEEPING AROUND.**

Think about it. When you sleep with someone, you're sleeping with everyone he or she has sex with for the past eight years. And if someone along the line had the AIDS virus, you would have been exposed. Unfortunately, there is no known cure for AIDS. Everyone who gets it dies. The AIDS virus is persistent. It stays in to sex. And by using sex to needle drug use, you should do it responsibly. I can't let it embarrass you to death. Get all the facts about AIDS, and talk about them with your girlfriend or boyfriend. Then if you choose to have sex, stick to one partner. And use a condom, properly, every time. It's one of the best defenses against AIDS. AIDS.gov www.aids.gov

True Love.

If you care for each other, protect each other. Use a latex condom every time. It's not 100% protection against AIDS—only doing without sex and IV drugs entirely does that—but it cuts your risk considerably. For more information, call the AIDS hotline in Northern California at 1-800-367-2437, or in Southern California at 1-800-922-2437.

AIDS.
It's Up To You.

Achieve undetectable.

If you're HIV positive, treatment can reduce your viral load, preventing the spread of HIV to others.

EvergreenHS.org | 716.847.2441

Transgender Healthcare Services Program

Healthy and HIV positive.

Access total HIV care in a supportive environment.

320 Prather Ave., Jamestown
EvergreenHS.org

Our program enhances access to care for patients with trans and non-binary experience and provides more fully integrated services that will improve our patients' health.

Modern Era of HIV

PrEP

Undetectable

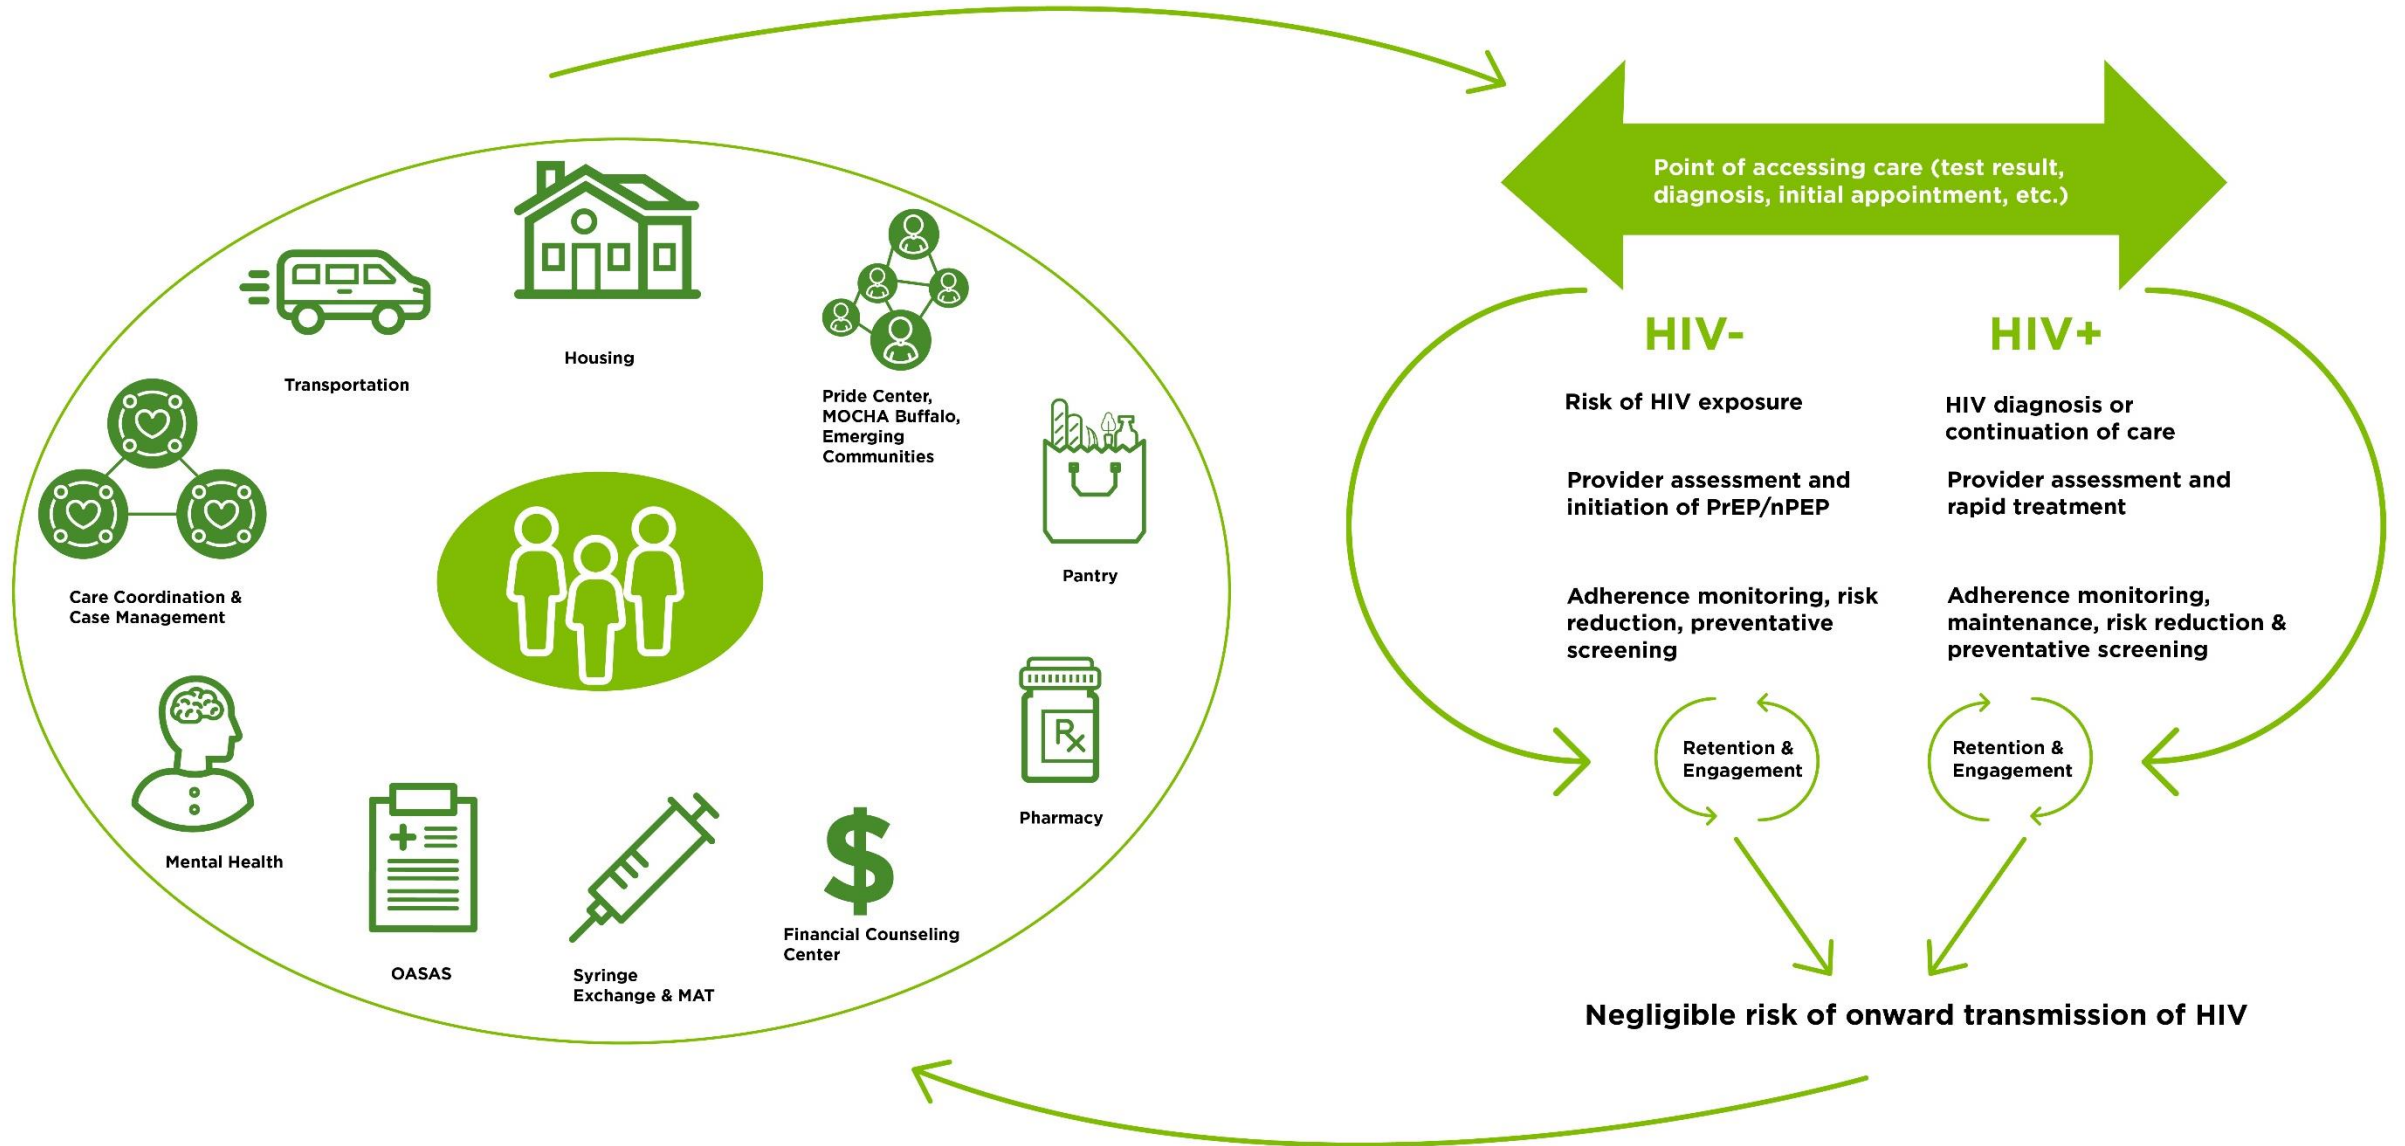

Status Neutral

- Destigmatizing HIV through
 - Mitigating fear of knowing status
 - Moving away from separation of treatment and prevention and the associated institutionalized paradigm
 - Person-centered, not disease-centered
- Dynamic and nonlinear in its goals as it relies on continual effort by patient and care team to maintain engagement, retention and adherence regardless of patient's HIV status

Evergreen Health's Status Neutral Model for HIV Treatment and Prevention

WHAT IS INCLUDED

- Nonprofit agencies that provide human services to community
- Faith based organizations if they provide direct services to the community
- Public agencies – city, county, state and federal
- Support groups
- For-profit if they meet a need not otherwise met by nonprofit or government

COMMUNITY NEEDS

- In 2022, 211 Helpline managed nearly 55,000 contacts
- Identified needs included food help, income support, housing issues and utility help, legal information and assistance, health care/health insurance help and help with transportation
- The need for help with transportation was identified nearly 1,500 times
- In 2023, through August, transportation needs are already over 700 (not including web requests)

TRANSPORTATION NEEDS

2022 Steuben County Office for the Aging (SCOFA) Needs Assessment reports respondents replied the need for help with transportation to appointments 86% as somewhat to very important

Transportation barriers are a significant impediment to health care access, especially for those with lower incomes or who are underinsured or uninsured

Research estimates show over six million people across the US delaying or missing medical care due to transportation insecurity has grown steadily

Rural communities not served by public transportation typically also have an infrastructure not conducive to walking or bicycling options to reach medical care

Missed health care appointments increases complications of chronic illness, increases hospital readmissions, undermines the opportunity for diagnostic testing and early detection

COORDINATED TRANSPORTATION SERVICES IS REMOVING BARRIERS

Providing transportation to elderly and disabled residents in need to non-emergency medical appointments, pharmacies, grocery stores, food pantries and other human service agencies, and substance use disorder treatment and recovery services.

Best Practices for Email Communications

Summer 2023 DOH Best Practices

KATHY HOCHUL
Governor

JAMES V. McDONALD, M.D., M.P.H.
Commissioner

MEGAN E. BALDWIN
Acting Executive Deputy Commissioner

BEST PRACTICES FOR EMAIL COMMUNICATION

General Considerations

As a department, we are striving to become more conscious of the number of emails staff read and answer each day. Over the last few years, during the pandemic, communication has become less personal and more dependent on technology. As we emerge from the pandemic, now is a good time to consider how to communicate better with each other. This best practices guidance offers ideas to help us all manage our inboxes and write/respond to emails most efficiently and effectively.

Before you hit "Send," ask yourself 3 questions:

1. Is this issue best communicated through email, or should a phone call or in-person conversation take place?
2. If multiple people are involved, should a meeting be scheduled instead of an email?
3. Is it possible to use [Teams Chat](#) to avoid many back-and-forth emails?

9 Tips for Sending Effective Messages

1. Use Standard Formatting
 - a. Check font and size for consistency.
 - b. If you used "copy/paste," check that font/size is consistent throughout the email.
2. Include a Clear Subject Line
 - a. Title your email so the recipient knows what the message is about.
 - b. If an email chain switches to a different topic, please update the subject line, or consider starting a new chain.
3. Include an Action Step
 - a. State upfront what you would like the individual/group to do with the information shared.
4. Always Keep Your Tone Professional
 - a. Think about your word choices and how others may interpret your intention.
5. "To/Cc" Fields
 - a. It's important to decide which staff get placed in **To** and **Cc** groups. Please include in the **To** line all staff who are involved in getting the task and/or follow-up done. If a group needs to be included for "awareness," please include them in the **Cc**.
 - b. Always double-check recipients to ensure you have the correct recipients, particularly if the chain originates from an outside entity and you are converting to an internal email chain.
6. What time is it?
 - a. Work-life balance matters. Refrain from sending emails after work hours or on the weekend unless it is an emergency. Emails can be saved in your "draft" folder and/or scheduled for the next day. [Delay or schedule sending email messages - Microsoft Support](#)
7. Reply Within 24-48 hours
 - a. If you are unable to fully respond within 24-48 hours, acknowledge that the email was received.

8. Is it better to pick up the phone?
 - a. If an email evolves into a "meeting," pause and schedule a meeting, or make a phone call.
 - b. If an email chain is getting voluminous and confusing, or tensions are running high, consider picking up the phone or scheduling a meeting to discuss. An email is never a place for conflict or for expressing displeasure.
9. Attachments
 - a. Double-check attachments to make sure the correct one is included or that the attachment is in fact included.

Form and Tone of Messages

Although an email is often viewed as informal communication due to the ease and speed of sending one, email should be considered the equivalent of formal correspondence sent through traditional mail. Remember that the recipient is free to share email as they choose. As such, you should compose your email with the following in mind.

Use Discretion

Use caution when sharing information over email because it may not remain confidential.

Emails discussing Department business, even if sent from a personal email address, are considered Department records that are subject to public disclosure under the Freedom of Information Law ("FOIL"). See Article 6 (Sections 84-90) of the NYS Public Officers Law ("POL"). Although there are a limited number of exemptions from disclosure under the law (POL § 87(2)(a-g)), an email may become a public record with or without your knowledge. In addition, emails may be subject to discovery in litigation and under third-party subpoenas. Accordingly, take steps to protect private, sensitive, privileged and/or confidential information about yourself, others, and the Department.

Identify a communication as confidential:

- When communicating with the Department's legal counsel, consider including the terms "Privileged & Confidential" in the subject line or at the beginning of the body of the email. This will help identify the email as a communication likely protected by attorney-client privilege that should not be shared outside of the Department.
- Use "Confidential" in the subject line when the email includes either sensitive information, or if the communication may not be appropriate for disclosure beyond the specified recipients.
- When it is necessary to share documents or data containing private/sensitive information beyond what is included in the body of the email, consider including these documents as an attachment in a password-protected file. (Note: The password to the file should be sent to the recipient in a separate communication.)

How to: [Protect a document with a password - Microsoft Support](#)

Responding and Forwarding Messages

Replying to Email

- The benefit of using "Reply all" is that you can respond to everyone at once to let them know you're addressing an issue. When in doubt, use "Reply" to respond only to the sender, and to avoid unnecessary emails. To determine which to use, consider the information you're sharing and who it most affects.

- Sometimes, it may be necessary to remove one or more of the original recipients when you send a reply. At the same time, you want to maintain the thread. You should clearly indicate that you have intentionally removed some original recipients.

Think Before Forwarding

- Please be sure to read the entire chain and use caution when forwarding. Consider starting a new chain with a summary of information, especially when sending it to outside entities.
- If the email chain is being forwarded, a good practice is to summarize what's being discussed at the top, so the recipient quickly knows what you need from them.
- It's also important to remember that some emails may contain private, sensitive, or privileged information, so you might not be able to forward them. If in doubt, check with the initial sender.

Informative Out-Of-Office Replies

If you plan to be out of the office for an extended period, set up an automated Out-Of-Office reply to let people know you won't be able to respond to their emails until a specific date. Include a contact name if there's an urgent matter.

How to link: [Create a signature and automatic reply - Microsoft Support](#)

Organizing the Different Parts of an Email

Shorten Links

When sharing a website, use a link shortener to shorten the link or hyperlink text within the email.

How to: [Create or edit a hyperlink - Microsoft Support](#)

Email Signature

An email signature is a special text box that displays your contact information at the bottom of an email. A signature typically includes only your name, job title, email address, and phone number. Additional information such as historic quotes, witty sayings, or life advice is sometimes not welcome by all recipients. It also adds more reading for the recipient. It is best if these are avoided.

NYS Guidelines for Email Signature:

Name (Arial Bold 16pt)
Function (Arial Regular 12pt)

Agency Name (in the Grouping Color - Arial Bold 12pt)
Address (Arial Regular 12pt)
Contact
Website

Highlighted best practices in the guide

1. Use standard formatting, include a clear subject line and an action step.
2. Always keep your tone professional. Think about your words and how others may interpret your intention.
3. What time is it? Work-life balance matters. Refrain from sending emails after work hours or on the weekend unless it is an emergency.
4. Reply within 24-48 hours. If you are unable to, acknowledge the email was received.
5. Double check attachments to make sure the correct one is included or that the attachment is in fact included.
6. Use discretion when sharing information over email because it may not remain confidential.
7. When in doubt, use Reply instead of Reply All to avoid unnecessary emails.
8. Use caution when forwarding emails and be sure to read the entire chain.
9. Use informative out of office replies to let people know you won't be able to respond until a specific date. Include a contact name if it is an urgent matter.

NYS Guidelines for your email signature

- A signature typically only includes your name, job title, email address, and phone number.
- Additional information such as historic quotes, witty sayings, or life advice is sometimes not welcome by all recipients. It also adds more reading for the recipient. It is best if these are avoided.
- Note: Your specific organization or department likely has unique branding and styles for email signatures to follow.

Name (Arial Bold 16pt)

Function (Arial Regular 12pt)

Best Practices for Email Communications Skill Building Activity

Skill Building: Identify the problem(s)

- The purpose of the activity is to present three different email examples and have participants individually identify the problem(s) with the communication.
- When you see a polling question pop-up, submit your answer for the number of problem(s) you found.
- Share with the group in the chat or raise your hand to share verbally why you selected this answer.

Fellow Spotlight: Joanna Craigmile

GIS and Social Determinants of Health: How Visual Data Helps Identify Rural Inequities

Joanna Craigmile
GIS Coordinator
Public Health Graduate Fellow
Wyoming County Health Department

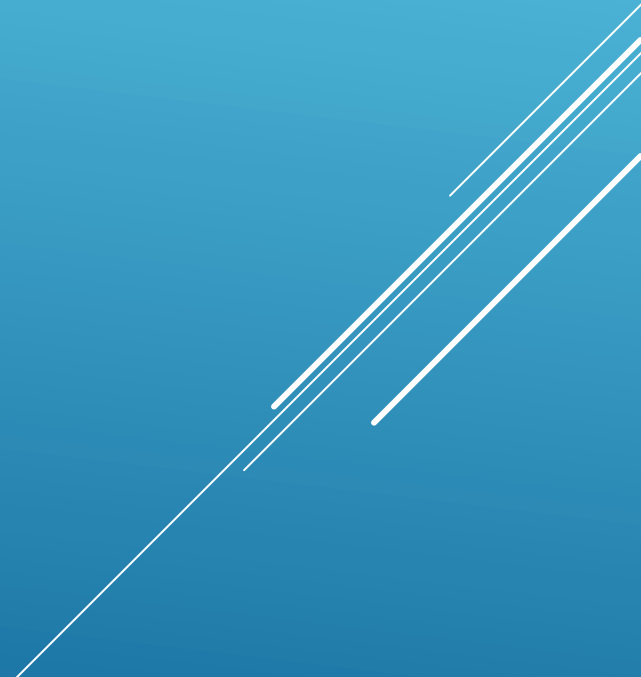

September 20, 2023

OVERVIEW

- ▶ What is GIS?
- ▶ Wyoming County GIS
 - ▶ Capabilities
 - ▶ Projects that Address SDOH Issues
- ▶ Future Possibilities

WHAT IS GIS?

- ▶ A spatial system that creates, manages, analyzes and maps many types of data
 - ▶ Integrates locations with descriptions and gives you a sense of where and what
 - ▶ Helps users understand patterns, relationships and the context of place
 - ▶ Results in improved communication, better management and informed decision making
- 

GIS IN WYOMING COUNTY

- ▶ GIS systems historically updated and maintained by IT staff
 - ▶ No dedicated staff, no regular data updates or training prior to my position being created through the Public Health Fellowship Program
 - ▶ Filling the Need and Building Relationships within the County and Towns:
 - ▶ Health Department
 - ▶ Highway
 - ▶ Planning
 - ▶ Zoning
 - ▶ Real Property
 - ▶ Emergency Services
 - ▶ 911
 - ▶ Soil and Water Conservation
 - ▶ Board of Elections
- 

DEMOGRAPHICS IN WYOMING COUNTY

- ▶ Wyoming County is rural and the population is aging
- ▶ Census Bureau Community Profile Shows:
 - ▶ Median age higher than NYS median (42.6/39.8)
 - ▶ Median household income lower than NYS median (60,013/74,314)
 - ▶ Percent of residents with bachelor degree or higher lower than NYS median (18.1%/39.9%)
- ▶ The rural nature presents inherent inequities in terms of Social Determinants of Health:
 - ▶ low population density and distance from resources results in inequities in access to health care and quality, education access and quality, issues with transportation, and a population that is spread out and may not have access to social support systems, healthy foods, quality jobs, etc.

Our environments cultivate our communities and our communities nurture our health.

When inequities are high and community assets are low, health outcomes are worst.

When inequities are low and community assets are high, health outcomes are best.

SOLVING LOCATION AND RESPONSE ISSUES

Staging Ambulances in Rural Wyoming County

Maximizing and Increasing Access to Health Care

Wyoming County Emergency Services
Ambulance Response Times (Existing Plus Arcade)

Wyoming County Emergency Services
Ambulance Response Times (Existing Plus Training Center)

FIRE DISTRICT MAPPING

- ▶ Fire companies in rural areas are volunteer and citizen based
- ▶ When tax data is mapped the residents taxed do not always match up with the residents served by each fire company
- ▶ Paper maps used by fire departments for response areas do not always match the boundaries used by 911 dispatchers
- ▶ Using GIS to identify actual boundaries based on historic descriptions, identify discrepancies, work with the municipality and fire companies to agree upon and finalize lines
- ▶ GIS serving as a tool to help sort out these historic issues, minimizing errors and getting emergency response vehicles there in a timely matter.

North Java (2020)/Varysburg (1961)/Sheldon (1963)/Strykersville (1952) Fire District Boundaries

Legend

- Roads
- Parcel Boundaries (2022)
- Parcels in North Java District, Taxed Varysburg
- Parcels in North Java District, Taxed Strykersville
- Parcels in North Java District, Taxed Sheldon
- Parcels in Sheldon District, Taxed North Java
- Parcels in Sheldon District, Taxed Varysburg
- Parcels in Sheldon District, Taxed Strykersville
- Parcel in Varysburg District, No Tax Information
- Parcels in Varysburg District, Taxed North Java
- Parcels in Varysburg District, Taxed Sheldon

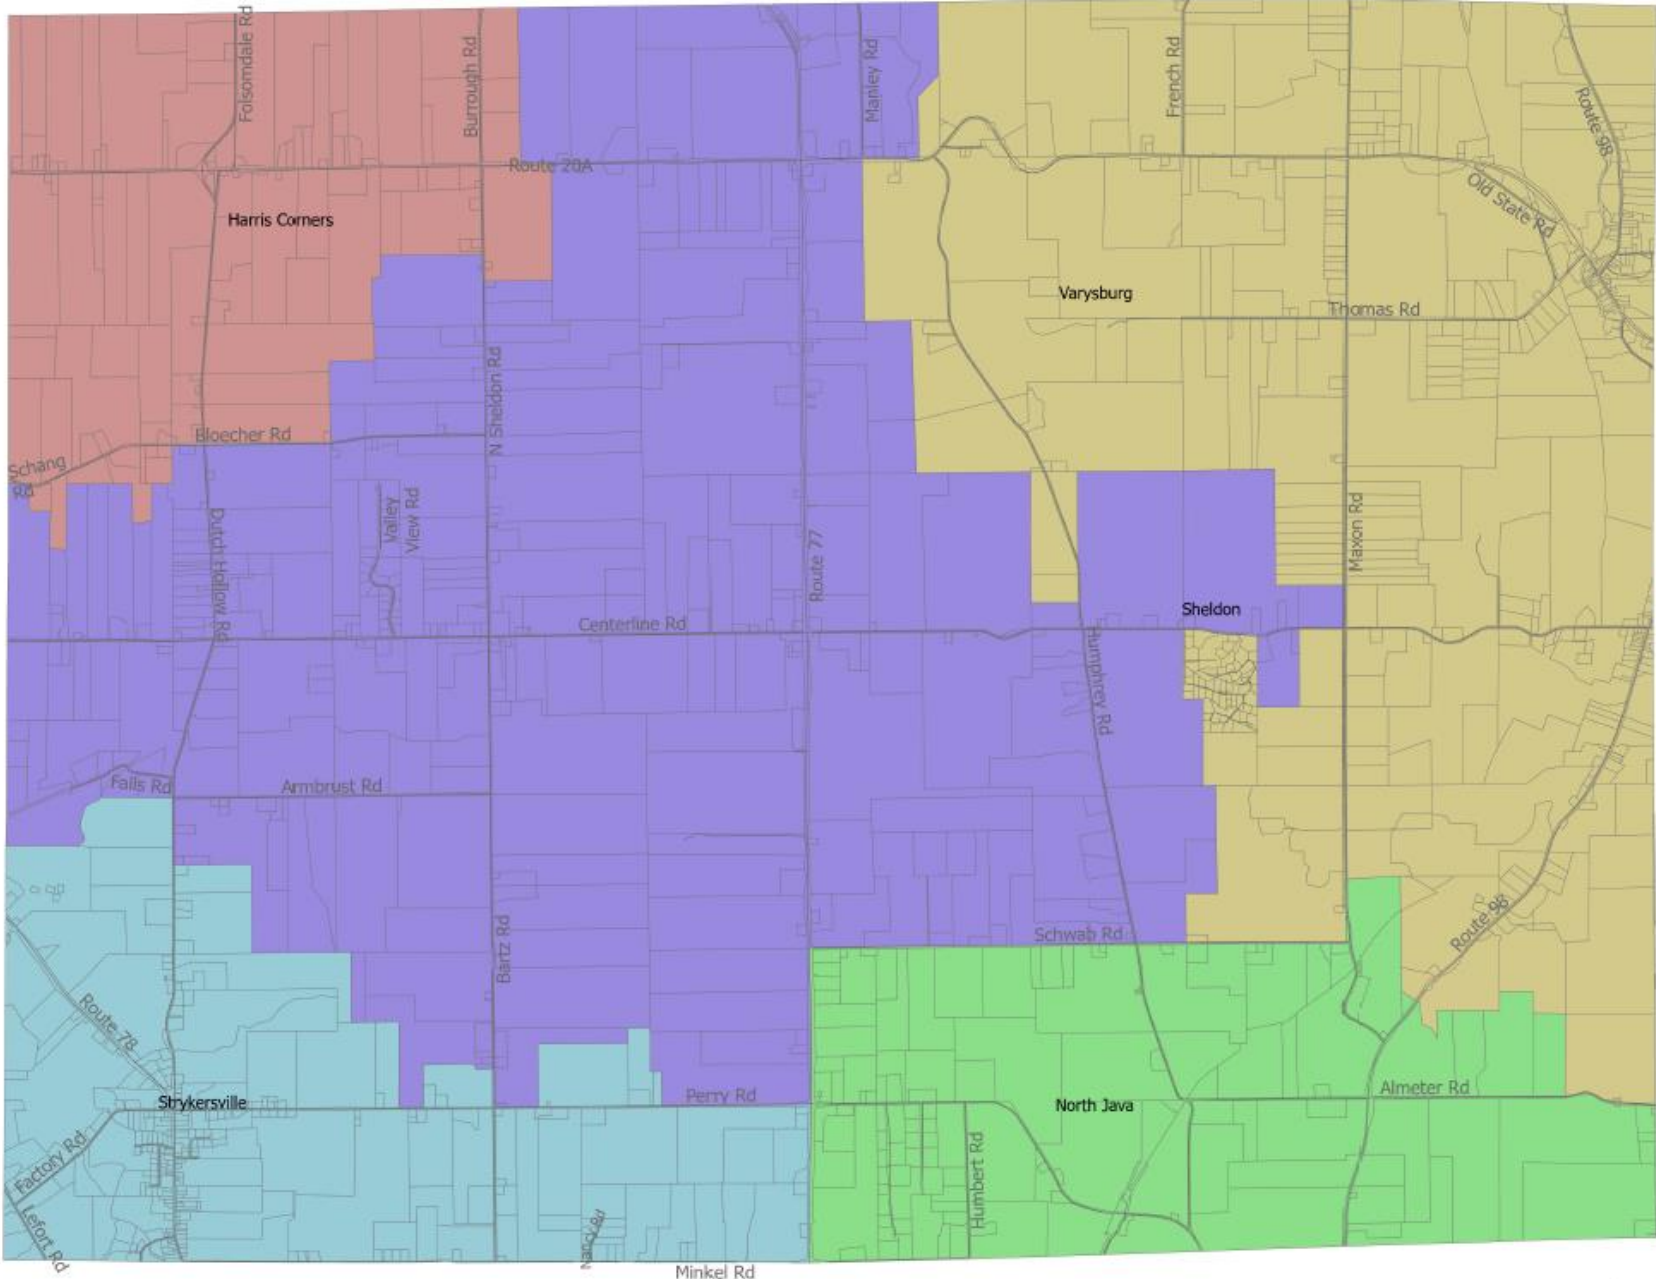

Fire Districts

- North Java
- Sheldon
- Strykersville
- Varysburg

Data on this map is subject to change. Please contact the Wyoming County GIS Coordinator for the most updated information.

District boundaries were estimated based on legal descriptions that were in some cases following the property lines of people who owned the land several decades ago. Parcel boundaries change over time as do landowners. There are some areas where the boundary was estimated based on these descriptions and may not be exactly as the original law intended because they split an existing parcel or the exact parcel could only be estimated based on the surrounding parcels and description.

Exhibit A: Town of Sheldon Fire Protection and Fire District Boundaries: May 2023

- Legend**
- Sheldon Parcel Boundaries
 - Sheldon Roads
 - Final Sheldon Fire Districts
 - Responding Fire Department
 - Harris Corners
 - North Java

MANAGE AND RESPOND TO EVENTS

Incident Mapper for Emergency Services

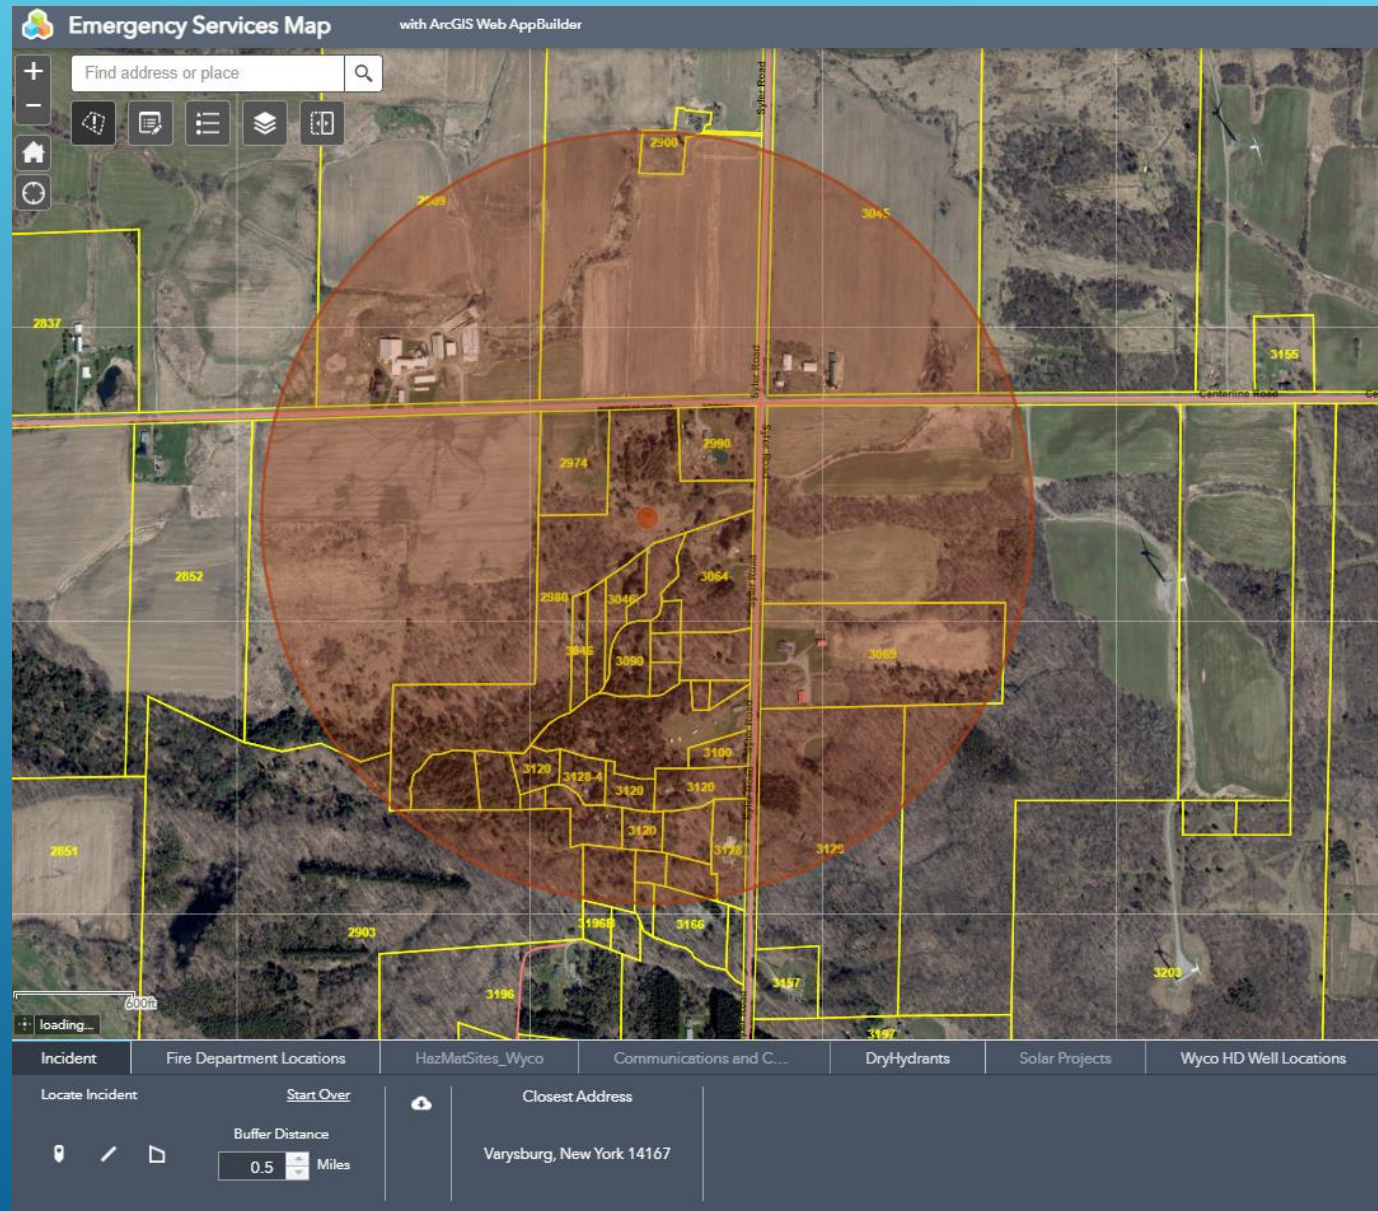

Uses Situational Awareness
to identify impacts and
resources in the event of
an emergency:

Private well and septic
locations

Wetlands/Waterbodies

Nearest hydrants

Nearest fire department

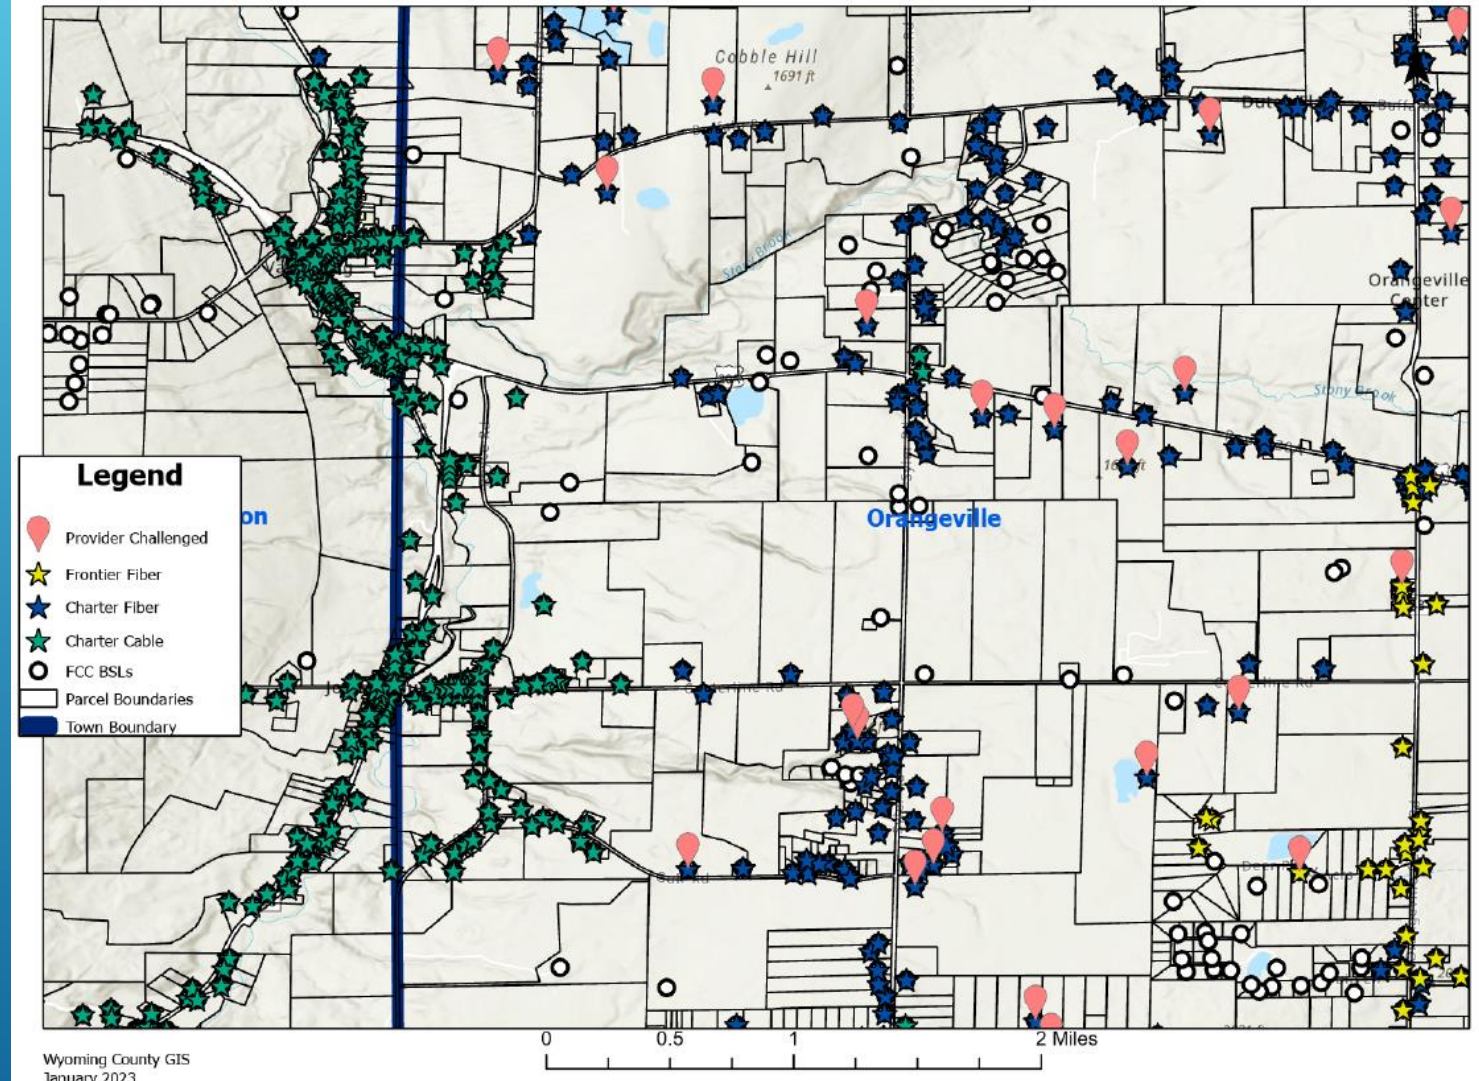

IMPROVING BROADBAND ACCESS

The Pandemic highlighted the need for broadband access more than ever.

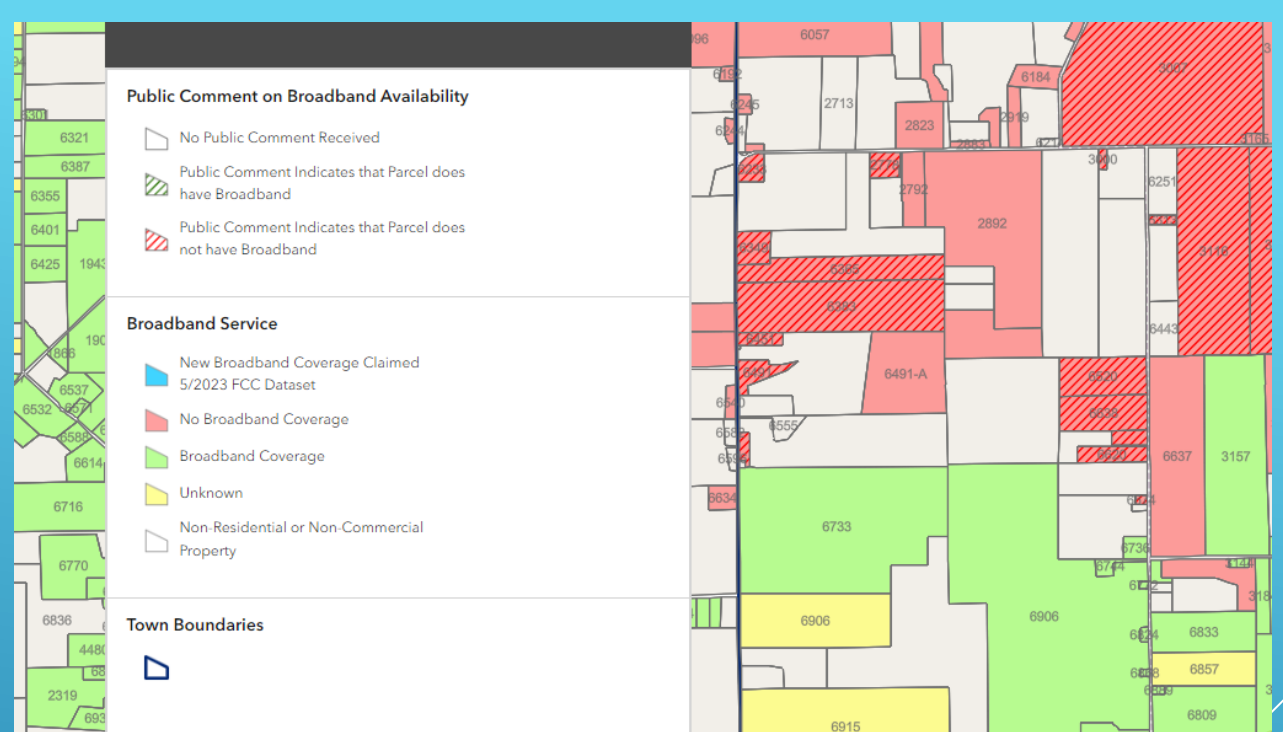

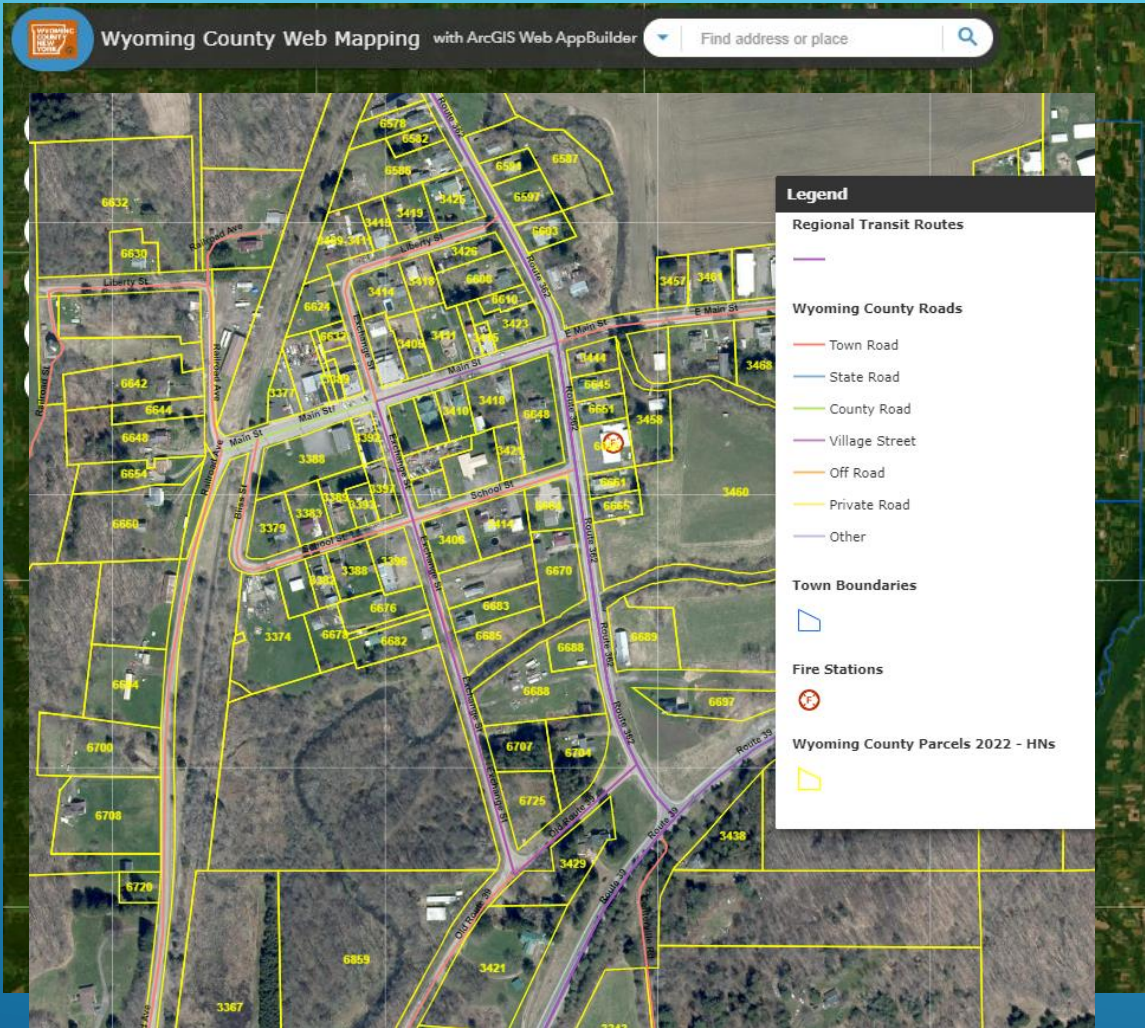

Rural Wyoming County residents do not have equitable access to broadband dependent necessities like online learning and telehealth.

Working through FCC and State Broadband Challenges in Wyoming County to work toward acquiring funding for connections and expansion.

Snapshot of FCC BSLs with Providers

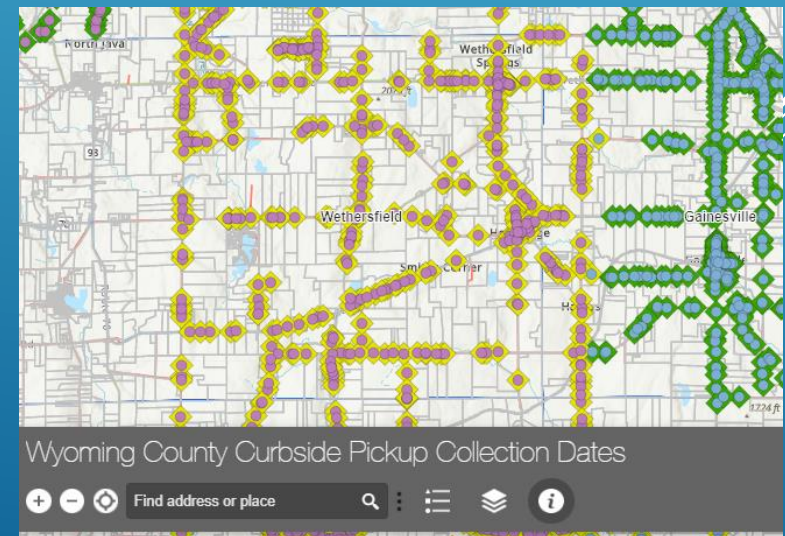

PUBLIC OUTREACH

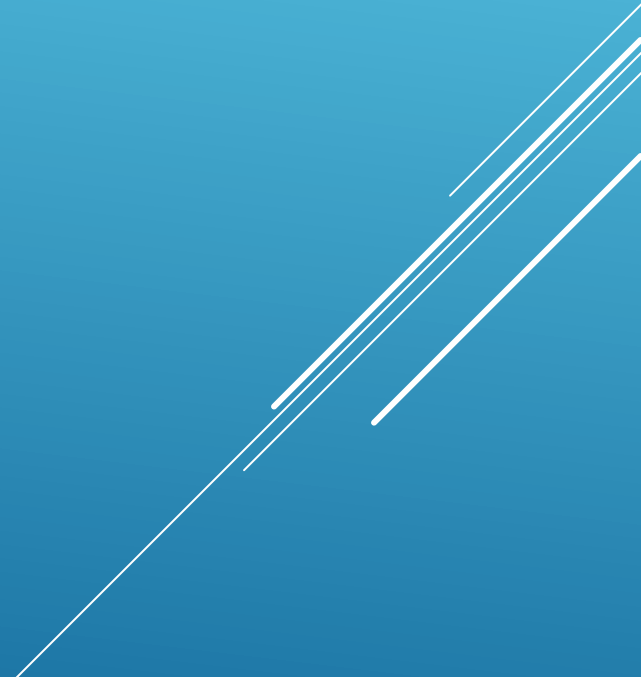

Wyoming County Existing Broadband Service (updated 9/11/23)

Provide feedback to improve Wyoming County's existing conditions map

FUTURE POSSIBILITIES

- ▶ Mapping ALICE (Asset Limited, Income Constrained, Employed) populations' concerns about SDOH. Survey being initiated soon.
 - ▶ Updating and Finalizing Fire Districts across the County
 - ▶ Updating work flows for Assigning Addresses
 - ▶ Emergency Response and Damage Assessment Mapping
 - ▶ Comprehensive Community Health Services Map with Rural Transit Routes
 - ▶ One Stop Mapping Portal on the Wyoming County website
 - ▶ SDOH can be mapped to focus County efforts
- 

THANK YOU!
