Visualizing New York State Data: An Overview of the Prevention Agenda and Community Health Indicator Reports Dashboards and How to Use Excel to Generate Your Own Visualizations

Prevention Agenda Tracking Dashboard

Naila Kabiraj, She/Her/ Hers

February 12th, 2025, 12 p.m. to 1 p.m.

SPEAKER BIO

Naila Kabiraj has a Master's degree in Public Health and is currently pursuing a PhD in Epidemiology. She works as a Program Research Specialist at the New York State Department of Health (NYSDOH) and has almost six years of experience in data management, analysis, and visualization. She generates public health reports and develops data dashboards that aid development of the modernized NYS Prevention Agenda dashboard and the Community Health Indicator Reports dashboard.

Please contact your Fellowship Placement Coordinator if you have any questions or concerns.

Presentation Overview

The presentation covers a brief walk-through of the New York State Prevention Agenda and Community Health Indicator Reports dashboards and demonstrates how the data may be downloaded and manipulated for generating visualizations in Microsoft Excel.

Learning Objectives

- Describe how to navigate the Prevention Agenda (PA) and Community Health Indicator Reports (CHIRS) dashboards
- Examine and interpret data
- Plot visualizations similar to displays on the dashboards using 1) traditional means and 2) pivot tables
