

PHOTO Tips

1	Explore your smartphone's photography modes and tools for the best shot for your subject
2	Clean all your lenses
3	Tap the screen to set the focus
4	Hold the phone steady
5	When photographing outdoors use natural light instead of the flash
6	Make sure your smartphone's High Dynamic Range (HDR) function is on. HDR captures more details with a wide range of contrast
7	Compose your photos creatively: <ul style="list-style-type: none">• Avoid placing your subject smack-dab in the center of the frame• Use symmetry• Try to include a natural frame around your subject
8	Take shots of people interacting and try the rule of odds: photograph a group of three, five, or seven people.
9	Try not to zoom in. Crop the image after you take the photo.
10	Take multiple shots
